

**Viva Due: Question 2 (16/10/2024)**

**Moodle Due: 23/10/2024 at 11 PM**

**1. Embedded SQL using C**

Develop an application package using C embedding SQL for the Airline Travel Schema you have explored in Session 5. Your package should simulate every command in DDL and DML.

//To install mysql header files -> apt-get install libmysqlclient-dev

//To run embedded sql in c -> gcc test1.c `mysql\_config --cflags --libs`

**2. Embedded SQL using PHP and HTML**

Develop an application package using PHP and HTML embedding SQL for the employee schema you have explored in Session 4. Your package should simulate every command in DDL and DML.

**---THE END---**
